24 Hours, 7 days a Week!

Best CV Design

Everything is designed. Few things are designed well
First impressions matter. Experts say we size up new people in
somewhere between 30 seconds and two minutes.

Extended Services

Don't Just get limited to a professional CV.We offer even more!
Get your professional Cover Letters and Much More!

2- Back-end Development (Not started)

- Laravel (PHP web framework)
- MySQL Database

Backend Details:

Account Creation :

Account Creation(Sign up/Register) has 3 phases

- 1- Account Created
- 2- Account Verified(Email Verified)
- 3- Account Activation (Subscription fee/ Facebook share)

(

after Step-3(Choosing Color scheme and template) , where the customer completed building the resume, he will see a circular loading animation for 1 or 2 seconds and after that he will be asked to verify his email address by entering a 4-digit code or clicking the link in his email. after that he will choose a password (requirements 1 letter 1 capital atleast)His account is created now and is subscribed to our newsletter as well. (unsubscribe links will be shown at the bottom of each email)

)

Website backend will be built on laravel. Laravel is a web application framework with expressive, elegant syntax. MySQL will be used for managing database.

Main idea of website in simple words can be

A user creates an account. At first the account is Created but not verified and Activated. The user has to verify the account by verifying email address. The user has to activate the account by Either paying subscription fee or sharing the website on facebook.

After the account has been activated, Users are eligible to download the CV.

Please note that Users can give their personal info first (Step-1 and Step-2) that will be saved in database but they cant download until the account is Verified+Activated. Once the account has been activated ,user will have access to his user CP where he can edit and download his resumes.

The Account activation via both methods(Subscription fee/Facebook share) will be for a fixed time period(That can be managed by Admin himself).

Main Roles:

- 1- Admin (Site owner)
- 2- User (Customer)

User can:

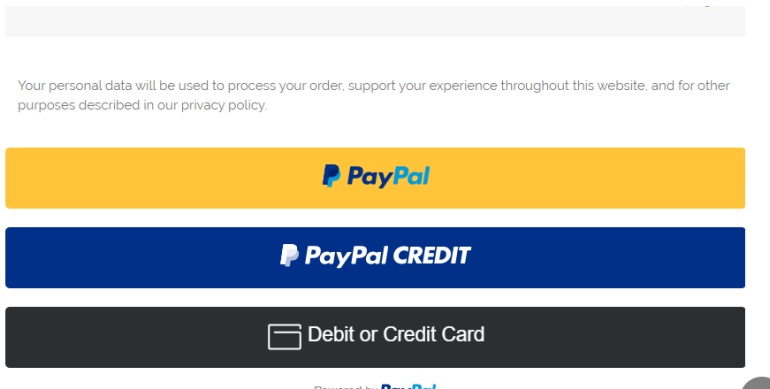

- Sign Up (Register)
- Sign in
- Activate Account by paying subscription fee
- Activate Account by Sharing website on facebook

Admin Can:

- Sign Up (Register) - yes new admin accounts
- Sign in
- Track the customers and running subscriptions and cancel those at request.

ADMIN PANEL INFO:

Payment method integrated: Paypal

Panel needs to be advanced and include all the basic, but critical features like managing members, managing the whole resume builder machine like changing the texts and icons and maybe even order it with drag and drop.

Another important feature is recommending options to the visitors. so if they write 2 letters, they will get to see a list of preset options.

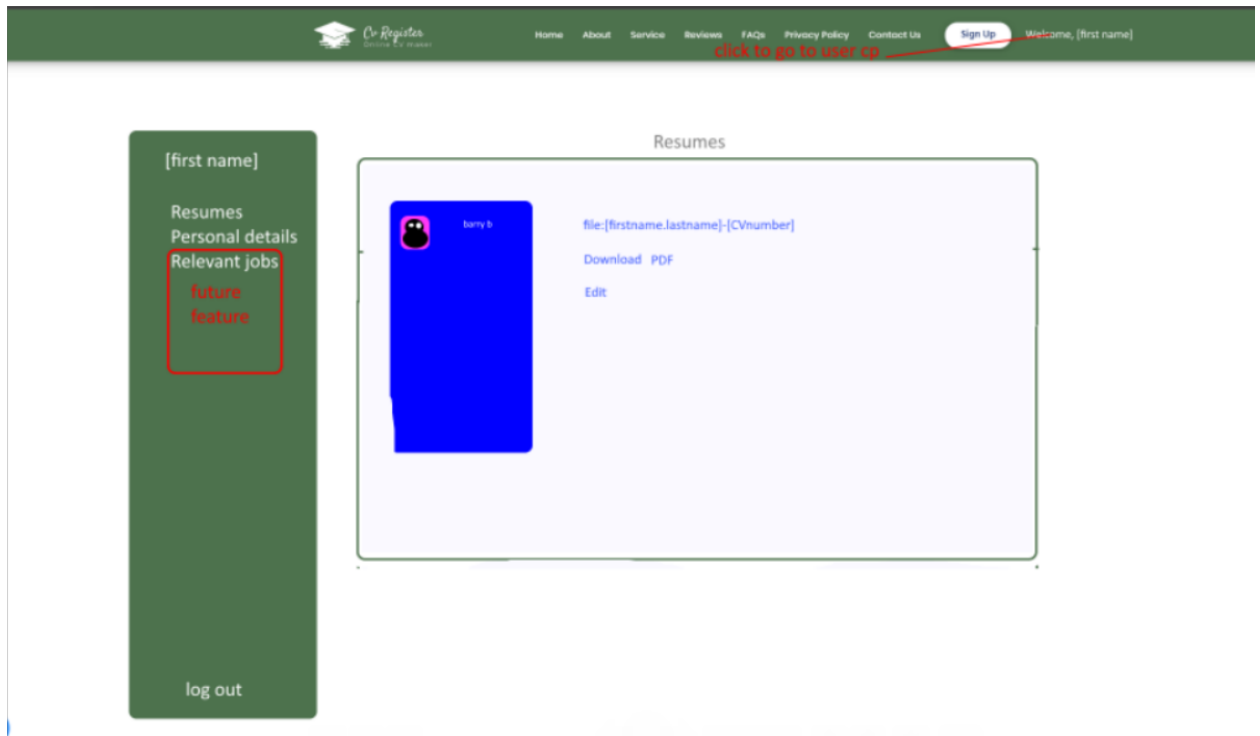

- Brute force/malware/hacking/ddos protection if possible
- Create new administrator account
- Change password/email for administrator account
- See sales of today/week/month/custom
- Add, Edit, and Change default order UI images 1-3 (everything must be customizable)
- Edit website Content

- Edit/Add/Remove Reminder emails (send x message after x days after registering but not upgrading account) HTML
- Upload/Remove Resume templates
- Add languages/ translate languages within admin panel
- -Search for users and filter them by any possible option such like name, exact birthday or range, residence, education level range, and custom by keywords
- -Mass export user resumes pdf's based on search results and filter (each resume 1 file in rar/zip) with user's full name as file name
- -See which users are subscribers and how much they have paid in total. (also be able to filter this)
- -Visitor statistics
- To keep track on anything so each customer and order needs a number like Customer ID/Order ID

USER PANEL INFO:

- Must be responsive like the frontpage/blog
- -The user will be able to download his resume, edit, or delete.
- The user can only change his password after he created the account. but can see his personal information like his name and address while entering the
- The user can see if he is a paid subscriber (show it as account: Active/Non-active) with a small green or grey ball before it. and he will see until which date it's active. He can request a subscription cancelation at the user cp as well.
- (try to order this information in seperate tabs/menus) The user CP should only show "Welcome back "first name" " & user's resume (+ the options edit/delete/download & account active or not
- If the user decides to download the resume. he proceed to account activation. This will bring him to the checkout page.
- If the user has not upgraded his account yet after a certain days. He will receive a reminder emails- more info in Admin CP options.
- Templates for CV should be 16. If you make 4 different templates and give them each 4 color schemes it'll be 16.

Sample(Concept of USER PANEL)

What do we need from you?

14-days paid subscription of CV.nl

We need to test several features, this is very much needed, it would be beneficial if done as soon as possible to save time

Download

Make a payment using the payment options below. After payment of € 0.99, the CV is delivered immediately and you waive the right of withdrawal. You have access to your account for 14 days to create and edit CVs, generate cover letters and use the other tools. After 14 days, your account will be automatically renewed and debited at € 7.99 per month. The subscription can be canceled at any time.
